University of South Carolina
NSF-REU Program in Japan

Are you an undergraduate student in Chemical Engineering interested in doing research abroad? Are you interested in participating in a unique cultural experience?

The University of South Carolina is proud to host the 3rd Annual National Science Foundation-Research Experience for Undergraduates (NSF-REU) program in Japan for the Fall semester of 2005!

Students will spend three weeks studying the Japanese language and customs before traveling to work in laboratories for three months at:

Osaka University in Osaka, Japan
or
Sophia University in Tokyo, Japan

What’s Included?
• Stipend plus living expenses
• Room and board
• An Unforgettable Experience!

How to apply:
Please contact the Administrative Coordinator at hetricka@engr.sc.edu or visit our website at www.che.sc.edu/centers/REU and click on Japan

Applications are due March 11th, 2005!
Visit www.che.sc.edu/centers/REU for more information on our programs.
